PROTIVITI CONTROLS EXCELLENCE APP

The next generation of Controls Excellence is here! The Protiviti Controls Excellence App for Celonis provides comprehensive and holistic integration of data analytics into all assurance phases. The app is based on our proven risk and control methodology. It leverages your own Risk Control Matrix (RCM) that forms the basis for determining the analytical control tests and performs detailed test analyses to take the right actions at the right time.
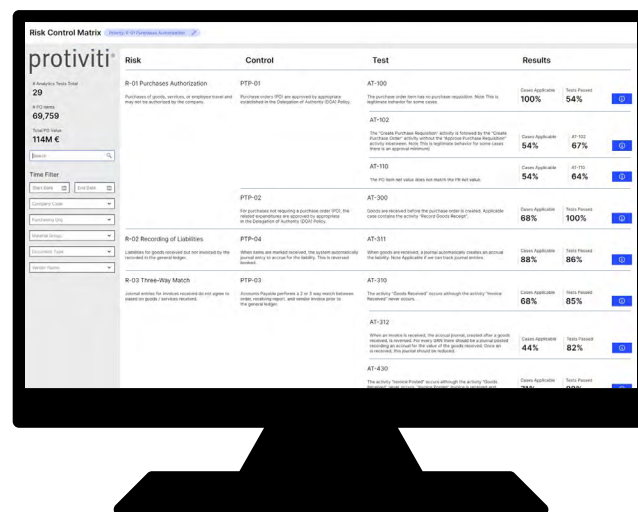

How We Help You Succeed

We deliver Controls Excellence for your organization by finding the right balance between controls and efficiency. Benefit from Protiviti's extensive experience in controls assurance, with gold-standard RCMs from our SOX in-a-box framework, which also includes analytical testing.

Key Features

- Automatic detection of control failures: transition from descriptive to prescriptive analytics.
- Provides data-driven visibility and enables monitoring of critical controls against established thresholds over time.
- Promotes intelligent and recommended actions to address the root cause of control failures.

Business Benefits

- Convenient subscription fee to use the Protiviti Controls Excellence App that scales with your requirements.
- Fully integrates with Celonis functionality: Celonis' automation capabilities (e.g. Action Flows) are used to obtain the desired behavior after a failed analytical test.
- Includes automatic dashboard creation and observation management support.
- Fast and competent support by phone or by mail during the subscription period.
