SAP Datasphere: Migration Accelerator

Reduce Migration Risks, Accelerate Time to Value

The transition from on-premises to cloud-based solutions is risky and must be carefully planned. With limited pre-built content to accelerate development, organizations are looking for ways to innovate faster and fully harness the power of their data using modern data platforms. Protiviti has the tools, experience and roadmaps to help you navigate the journey with ease and achieve your digital transformation goals.

No matter where it resides, we'll get you seamless access to your mission-critical data.

Technical migration path for up to 80% of legacy content

Migration Accelerator Benefits and Deliverables

Protiviti's SAP Datasphere migration accelerator is tailored to help businesses assess, plan, estimate and design a strategy to migrate legacy SAP BW landscapes to SAP Datasphere.

KNOWLEDGE SHARING WORKSHOPS

Empower technical and business decision-makers with knowledge of the full capabilities, architecture and components of the SAP Datasphere. Fundamental knowledge sharing workshops will increase the efficiency of key players through all phases of the project planning.

DATA LANDSCAPE ASSESSMENT

Collect the relevant technical and business information required to properly design a migration strategy. The documented results of the assessment are leveraged for the project planning phase, SAP software cost estimations, and overall strategy.

FUTURE-STATE REQUIREMENTS AND GOALS

Define your long-term SAP data management goals to design the ideal SAP Datasphere architecture for your business. Capture overall change impacts, total cost of ownership (TCO) goals and future-state analytics capabilities.

MIGRATION STRATEGY PLANNING

Analyze the technical migration process to establish an efficient project, resource and migration plan.

ORGANIZATIONAL CHANGE MANAGEMENT (OCM)

Incorporate a sound OCM strategy to increase awareness, adoption and knowledge across the organization, for a seamless migration.

INNOVATE. TRANSFORM. SUCCEED.

SAP DATASPHERE OVERVIEW

- SAP Datasphere is an end-to-end data management and decision-making SaaS solution designed for business and enterprise-grade experiences.
- It is an integrated, fully managed service, and persona-driven, Data Fabric and Warehouse as a Service solution, suitable for SAP and non-SAP customers offering reduced deployment complexity, flexible pricing with integration to SAP Intelligent Enterprise Suite solutions, SAP Analytics Cloud, SAP BTP services, Partner solutions and open-source technologies.
- It offers scalable and flexible data federation, data tiering, data modeling, metadata management and lineage analysis without complexity.

SAP DATASPHERE FEATURES

- Intelligent and secure data provisioning with Federation, Replication or Batch loading to the cloud
- Secure, organized and scalable allocation of storage and memory
- End-user focused, graphical data modeling and SQL scripting
- Data protection and privacy
- Flexible, open-consumption model for both SAP and non-SAP tools

BUSINESS RESULTS

- Increased trust in the data pipeline and transformation process with a modern interface designed to facilitate both IT and business users' data management
- Reduced TCO for IT and empowerment of business users to manage data pipelines
- Reduced complexity of the traditional data pipeline with virtual modeling
- Increased agility of logic changes and data modeling enhancements
