Multinational Consumer Products Company Modernizes FP&A Globally With SAP Analytics Cloud

PROFILE

This U.S.-based client is a multinational consumer products company that has been in business for more than 150 years and now has more than 40,000 employees in 80 countries around the globe.

CLIENT SITUATION

The company's financial planning and analysis (FP&A) processes were inefficient, siloed and cumbersome, with many locally developed tools and data structures, creating inconsistencies and duplicative work. Processes were decentralized, causing additional administrative burden and providing limited insight.

WORK PERFORMED

The client was introducing SAP S/4HANA as a global platform for finance transformation and needed a leading SAP partner to drive implementation of its SAP Analytics Cloud planning function. This tool would support centralized FP&A functions for 50 plus countries in Asia-Pacific, EMEA, North America and Latin America.

OUTCOME/BENEFITS

Improvements to the FP&A processes include faster scenario cycling, the ability to quickly identify risks and opportunities, and a more comprehensive ability to recognize and analyze change globally in product demand, ultimately improving operating profits and net income by keeping a keen eye on changes in margin.

Data Preparation Best Practices: SAP S/4HANA

Data quality is crucial for a successful SAP S/4HANA implementation. Poor data can cause delays and cost overruns, and may not be detected until testing or go-live. To avoid this risk, companies should plan and execute a data conversion strategy before the project begins. This will ensure that the data is ready and compatible with the new system, and will save time and resources in the long run.

Learn more about how to prepare your data for SAP S/4HANA in our latest blog post.

SURVEY

Global Finance Trends Survey

Dive into the results of our 2023 Global Finance Trends Survey

Results from our latest Global Finance Trends Survey, based on responses from over 900 finance leaders worldwide, show that CFOs recognize the volume and magnitude of the challenges bearing down on them and their finance groups. Our report provides an in-depth look at the priorities on the minds of CFOs and finance leaders, along with practical calls to action for them to address these challenges.
