### Strengthening Security Against AI-Powered Attacks

Generative AI (GenAI) technologies such as ChatGPT have demonstrated substantial advantages across multiple industries, including the field of cybersecurity. These AI models are becoming integral to all phases of the cyberattack process. Developing advanced security measures is imperative to effectively counter the growing threat of AI-powered cyberattacks. This blog outlines some of the security measures that organizations should consider.

## FLASH REPORT

### NIST Releases Version 2.0 of Its Cybersecurity Framework (CSF)

On February 26, 2024, the National Institute of Standards and Technology (NIST) released version 2.0 of its updated and widely used Cybersecurity Framework (CSF). This latest edition of the CSF is designed for all audiences, industry sectors and organization types, regardless of their degree of cybersecurity sophistication. In this Flash Report, we summarize the key changes in the updated framework and provide guidance and recommendations for organizations on preparatory steps to take.
