Building resilience through AI-powered experiences

 [Click here for a video preview](#)

Benefits of our AI-powered crisis simulation:

- **Prepare for the unforeseen**
Help your organization understand how to anticipate and respond to emergencies and limit potential damage.
- **Strengthening your resilience**
Enhance your organization's resilience by testing and improving critical response skills and processes.
- **Awareness and education**
Increase awareness of the impact of a crisis and educate your employees on their roles and responsibilities.

What is an AI-powered crisis simulation?

Live scenario generation

Scenarios are created live during the simulations using Generative AI. They are not pre-made or pre-configured and do not have a defined 'start' and 'end' yet are surprising – just like a real-world crisis.

Dynamic

Scenarios require responses from the participants in the simulation. Their responses are fed back in real-time into our AI-model and their actions impact and determine the course of the crisis.

Expert guidance

Protiviti provides live facilitation of each simulation. Our expert facilitators encourage critical thinking and decision making by your people, without interfering with the content, roles & responsibilities.

Who is it for?

Our solution is highly flexible in catering for all audiences and serving multiple purposes. Ranging from strategic decision making at Board level to creating risk awareness at Staff level – and anything in between.

Staff:

- + Operational focus
- + Team-specific scenarios
- + Focus on personal responsibilities
- + Applying policies and procedures

Managers:

- + Tactical focus
- + Team-specific scenarios
- + Focus on leadership & collaboration
- + Testing policies and procedure effectiveness

Board:

- + Strategic focus
- + Organization-wide crisis
- + Focus on leadership & decision making

Engage and challenge your team to improve:

- + Problem-solving and decision-making
- + Communication and leadership excellence
- + Emotional intelligence and stress management
- + Ethical and innovative thinking
- + Risk awareness and situational analysis
- + Stakeholder engagement and interpersonal skills

What are the unique benefits of our AI-powered experiences?

AI-powered

Live and flexible scenario generation

Scenarios are created live during the session and are customized to your requirements and specific business context.

Participant actions have a direct impact

Scenarios require responses from the participants in the simulation. Their responses are fed back in real-time to our AI-model and determine the course of the crisis.

Expert guidance in a live setting

Protiviti provides live facilitation of each simulation. Your people are in full control of their actions.

Features

Conversational AI

Our simulations leverage conversational generative artificial intelligence to do live, realistic and immersive communication exercises.

Immersive video

Our simulations begin with captivating, AI-generated video scenes designed to immerse participants in the crisis. These videos combine realistic visuals and compelling narratives to bring the situation to life, whether it's a breaking news broadcast or an unfolding crisis at your organization.

Unlimited scenarios – all tailored to your organization
