Why Protiviti and SecurityBridge?

Protiviti supports companies to optimise their SAP security with the most modern and efficient solutions on the market. In partnership with SecurityBridge, we offer a powerful security platform that can be seamlessly integrated into your existing SAP environment. Our goal is to support companies to strengthen their cyber security, meet regulatory and internal compliance requirements and proactively minimise risk.

Thanks to our expertise in consulting, implementation and continuous optimisation of SAP security solutions as well as our managed services, which include taking over internal areas of activity and responsibilities, we ensure holistic and sustainable protection of your SAP systems.

Using SecurityBridge as a technical tool, we analyse and identify SAP-specific vulnerabilities, optimise your SAP patch management, detect threats at an early stage and initiate targeted countermeasures. We combine our in-depth knowledge of IT security with comprehensive expertise in SAP.

Overview SecurityBridge

We'll guide you with expert advice on SecurityBridge and its modules in order to develop a customised and risk-based solution for your company and strength the security of your SAP systems in the long term.

Please see below for the individual SecurityBridge modules, which can be selected as a full package or individually.

The SecurityBridge modules

CORE SAP SECURITY			
Patch Management	SAP Vulnerability Scanner	Code Vulnerability Analyzer for ABAP	Real-time Threat Detection

ADVANCED SAP SECURITY			
Privileged Access Management (Hyper Logging)	Interface Traffic Monitor	Transport Security	Data Loss Detection

Strong SAP Security with Protiviti.

Protiviti provides you with comprehensive advice on the implementation of SecurityBridge, develops a customised solution for your SAP landscape and integrates SecurityBridge seamlessly into your existing systems. Through individual customising, we ensure that the solution is perfectly tailored to your requirements. As your sparring partner, we provide you with ongoing support, continuously optimise the security measures and efficiently resolve any challenges that arise.

With Protiviti's Managed SAP Services, you can partially or completely outsource central SAP tasks such as patch management, analysing vulnerabilities or responding to threats. This relieves the burden on your internal team. As part of this service, we can also carry out regular segregation of duty analyses, SAP penetration tests at infrastructure, application and database level as well as SAP threat analyses.

Rely on Protiviti as a strong partner for your SAP security – we ensure holistic and future-proof protection as well as a 360-degree overview of your SAP systems.

YOUR ADVANTAGES WITH SECURITYBRIDGE AND PROTIVITI

TIME SAVING
SecurityBridge implements security notes automatically, thereby reducing the load on SAP Basis in the long term and saving valuable time.

RISK MANAGEMENT & MITIGATION
The SecurityBridge vulnerability scan enables full transparency and creates the basis for targeted risk management and effective mitigation.

TRANSPARENCY
SecurityBridge makes security events in SAP visible and provides the transparency needed to effectively operate threat detection and an SAP SIEM.

CUSTOMIZING & MANAGED SERVICES
Protiviti's customising and managed services turns SecurityBridge into a tailor-made solution that is tailored to your individual risks, systems and escalation processes.
