

Where your career could take you

Protiviti Australia's business consultant stream

As a business maestro, you'll work across financial services, government, and energy & utilities supporting top ASX organisations and major public sector agencies as they deliver complex programs and navigate risk, compliance, and transformation.

Internal audit

Review processes and controls to identify gaps, test effectiveness, and help strengthen how organisations manage risk.

Program and project assurance

Support independent checks on major programs to assess delivery health, governance, risks, and whether outcomes are on track.

Risk Management

Help identify, assess, and monitor risks through workshops, registers, and tech-enabled tools that improve organisational resilience.

Compliance advisory

Assist in reviewing regulatory requirements, assessing compliance gaps, and helping design policies and controls to meet standards.

You will:

- Support major digital and transformation programs through assurance, risk reviews, and governance uplift
- Help ASX-listed companies and government agencies strengthen delivery confidence and meet regulatory expectations
- Work on real projects involving service redesign, risk uplift, policy development, and program recovery
- Conduct deep-dive assessments into what's working, what's not, and where improvements are needed.

Where your career could take you

Protiviti Australia's technology consultant stream

Join our technology team and help organisations across Australia modernise, innovate, and strengthen their digital foundations. You'll work with clients to design and deliver projects that enhance security, uplift resilience, streamline operations, and create better experiences for the people who rely on their services. If shaping the future of technology-driven transformation inspires you, this pathway is built for you

Cybersecurity

Help organisations strengthen their security posture by identifying vulnerabilities, assessing cyber risks, and supporting initiatives that protect critical data and systems

Data & AI

Use data, analytics, and AI-driven insights to help clients make smarter decisions, enhance services, and modernise their operations

Operational resilience

Support organisations in preparing for, responding to, and recovering from disruptions by improving their continuity planning, incident response, and operational strength

Cloud services

Assist with cloud strategy, migration, modernisation, and governance, helping clients adopt secure, scalable technology environments that are ready for the future

You will:

- Work on digital and cyber uplift programs across major Australian organisations and agencies
- Contribute to cloud migrations, system modernisation projects, and technology strategy work
- Support cybersecurity assessments, penetration testing coordination, and risk reviews
- Use data and analytics to uncover insights that guide smarter decision-making
- Help teams design technology solutions that improve user experience, accessibility, and service delivery
- Collaborate with multidisciplinary experts - engineers, risk specialists, designers, and business consultants to deliver successful technology transformation.
