

SAP Intelligent Robotic Process Automation (iRPA) Implementation Services

RPA Services by Experienced SAP Professionals

Protiviti SAP Intelligent Robotic Process Automation (iRPA) Implementation Services are part of a comprehensive suite of RPA Services that includes:

- RPA Strategy
- Process Evaluations
- Proof of Concept
- Infrastructure Validation
- Bot Development
- Training & Change Management
- Center of Excellence (CoE) Design
- Managed Support

An optimized RPA environment eliminates repetitive tasks and enables the business to achieve greater impact by focusing more time and attention on higher-value activities. Our highly experienced RPA professionals have deep SAP expertise. We take a strategic approach, demonstrating quick value and establishing an RPA operating model that delivers real business results.

Up to **88%**
of RPA leaders will see
revenue gains in just
2 years

SAP iRPA Capabilities:

System-Agnostic

SAP's iRPA product extends outside of the SAP ecosystem, with the ability to automate non-SAP applications. It offers both unattended and attended automation.

Intelligent Integration

Leverages SAP Leonardo for machine learning, conversational AI, and document processing capabilities over a single unified cloud-based solution, providing best-in-class integration with SAP applications.

Unique Pricing Model

Transaction-based pricing options to best fit your forecasted iRPA needs following a tiered-pricing model. No indirect license fee for bots accessing SAP, as SAP does not charge for intra-SAP integrations.

Pre-Built Content

Pre-built content, designed so minimal changes are needed, accelerates the Intelligent Robotic Process Automation journey.

SAP Intelligent Robotic Process Automation (iRPA) Implementation Services

The Straightforward Approach to RPA

Identify

Identify the scope of the processes that can derive value from automation

Prioritize

Prioritize automation candidates and select a sample for a Proof of Concept

Evaluate

Evaluate and assess the value and complexity of automation for each process

Pilot

Pilot the automation using the Minimum Viable Product (MVP) approach

Deploy

Plan, deploy and monitor the approved solution in the production environment
