

Microsoft Teams Enablement

Powered by the Microsoft Cloud, Microsoft Teams is designed for teamwork and flexibility to bring together the best of Office 365 into a single workspace for working with people, managing conversations, maintaining files, and integrating Office 365 applications, so everyone has instant access to everything they need for a successful collaboration.

Protiviti's Microsoft Teams Enablement Solution provides organizations with a clear, defined path for a successful Microsoft Teams rollout. This multiple phased approach allows organizations to define where Teams will fit in their organization's existing business processes, ensure technical platform readiness and user readiness. And, since users must actually use Teams to realize the maximum benefit, our solution ensures successful adoption with an effective organizational change management plan.

DISCOVERY & ALIGNMENT

Provide a clear, defined vision of where Teams will fit into the organization's existing business processes along with the culture.

- Understanding existing deployment
- Alignment of goals, scope and business scenarios: roadmap, timeline, strategy
- Overview of architecture

PLATFORM READINESS

Ensure technical platform readiness before deployment with agreed upon governance, security, compliance, communication, migration and overall Office 365 deployment status.

- Governance
- Collab and communication
- Security & communication
- Organizational change management

PILOT ESTABLISHMENT

Complete the roll-out through pilots and waves while continuously gathering user feedback.

- Identify users / use cases
- Platform and user testing
- Technical implementation
- Awareness & feedback

ONBOARDING & CONTINUOUS IMPROVEMENT

Provide a successful adoption plan with effective organizational change management based on communication, training, leadership, feedback and ongoing awareness.

- Roll-out
- Adoption
- Enhancements
- Awareness
