

# Optimizing RPA in Energy and Utilities Companies

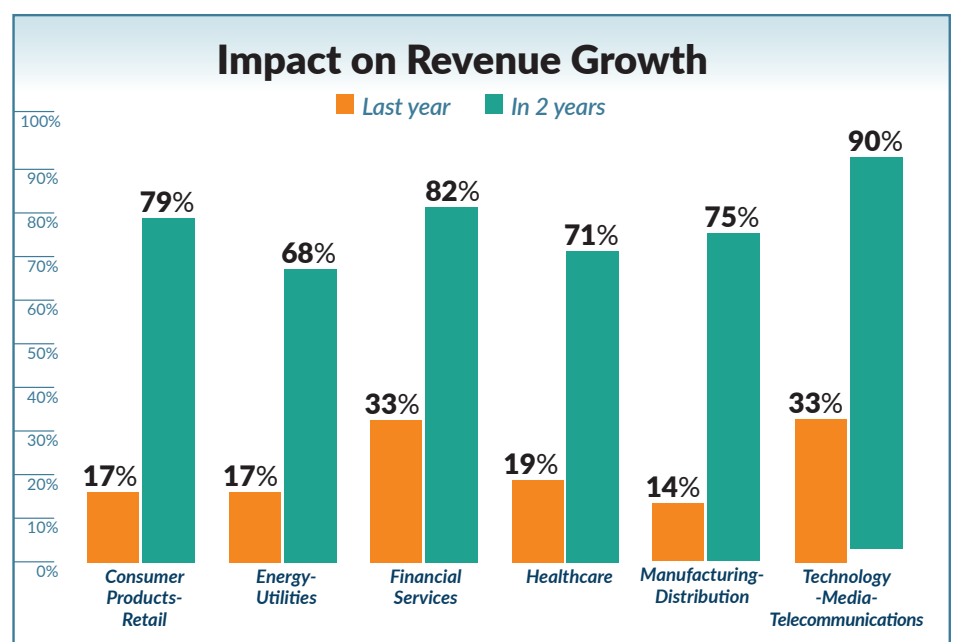

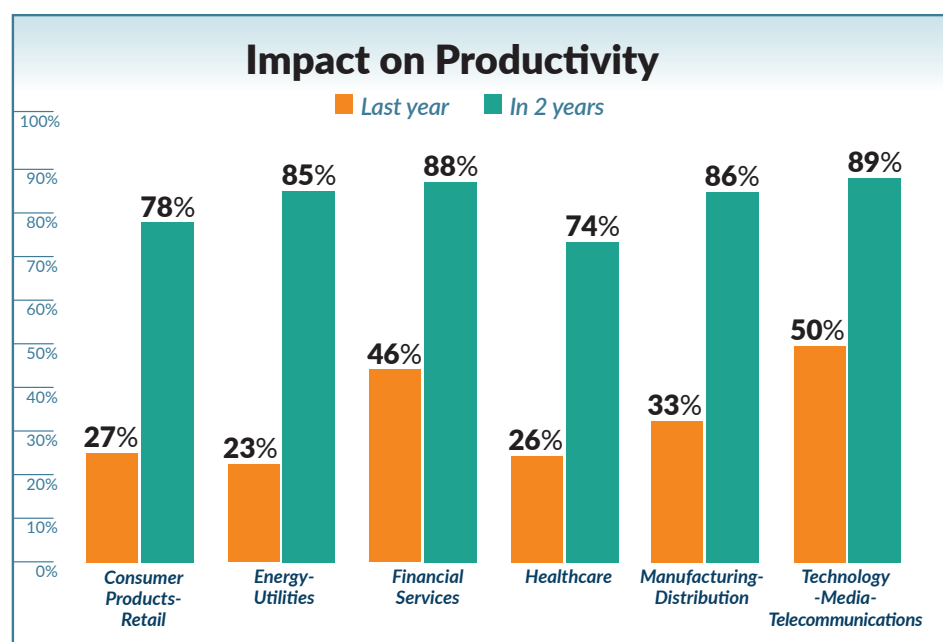

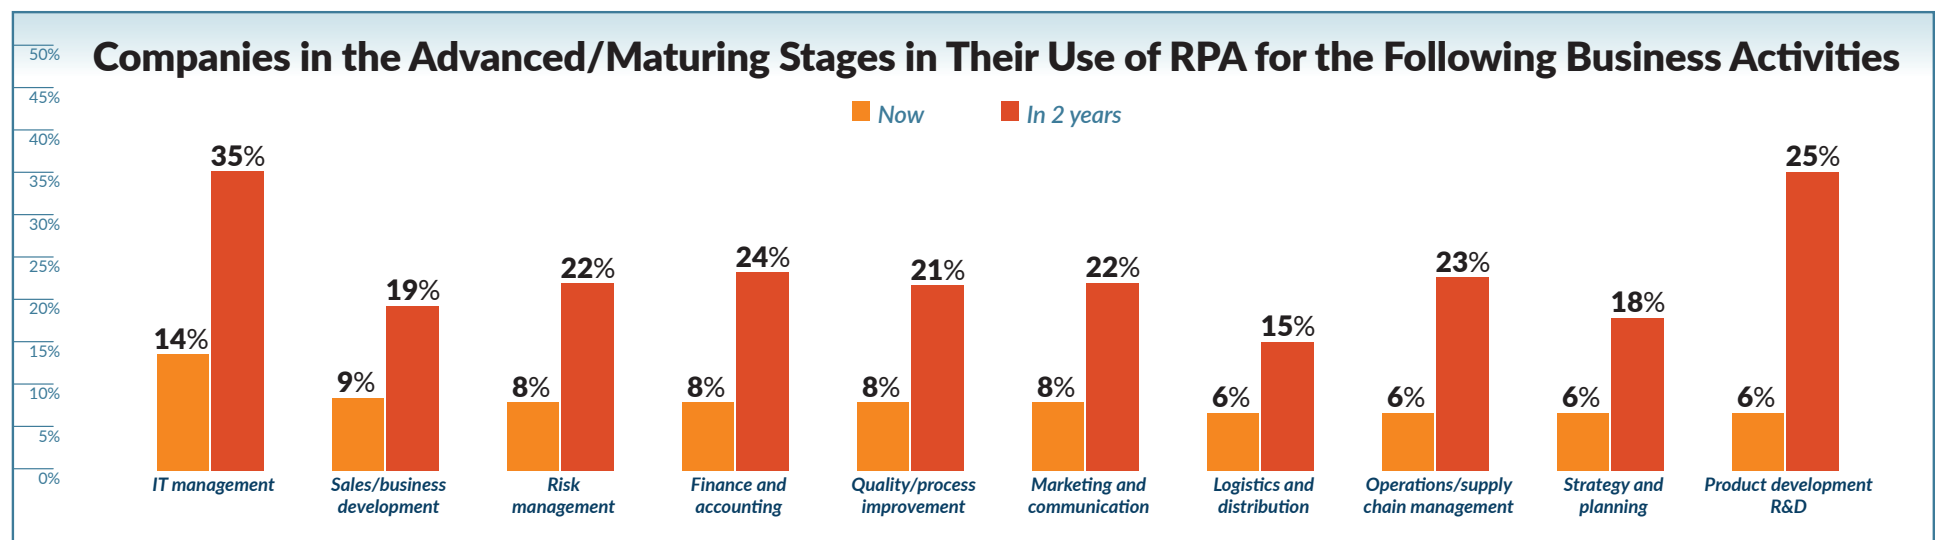

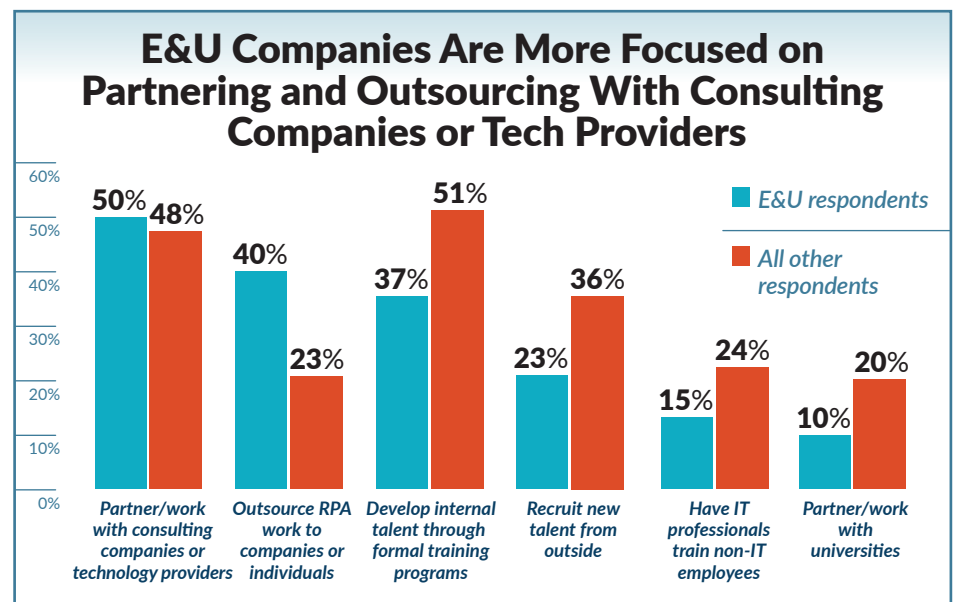

Energy and utilities (E&U) companies are using robotic process automation to kick-start their digital journeys.

Companies across all industries are pumping resources into robotic process automation (RPA). The majority of E&U executives expect their use of RPA to continue to expand over the next two years. These are among numerous takeaways from a global survey conducted by Protiviti and ESI ThoughtLab.

E&U survey participants:

RPA delivers many benefits: E&U companies are finding that their RPA investments produce benefits far beyond cost savings.

For more information, read *Taking RPA to the Next Level*, available at [www.protiviti.com/RPA](http://www.protiviti.com/RPA).
