

# Microsoft Dynamics 365 Finance & Operations

## Transform Your Financial & Business Operations

Unifying and automating financial processes enables organizations to reduce operational expenses and make smarter and faster decisions. By adopting a modern ERP system, organizations have experienced a reduction in operating costs, reduction in administrative costs, improvement with customer satisfaction, and an increase of innovative processes.

With Microsoft Dynamics 365 for Finance & Operations, key operational and financial processes within your business are all seamlessly connected into one application: supply chain, financials, sales and purchase orders, inventory, production, and distribution. Microsoft Dynamics 365 F&O is an enterprise resource planning (ERP) service for enterprises that supports unique compliance requirements and helps adjust to constantly changing business environments.

## The Power of Microsoft Dynamics 365 Finance & Operations

### Drive strategic financial decisions

Assess and improve financial controls and make strategic decisions faster to drive growth by using real-time, unified global financial reporting, embedded analytics, and predictive insights.

### Unify and automate your financial processes

Unify global financials and operations to empower people to make fast, informed decisions. Monitor performance in real time, predict future outcomes, and make data-driven decisions to drive business growth.

### Reduce operational expenses

Minimize costs and optimize spending across business geographies with process automation, budget control, and financial planning and analysis.

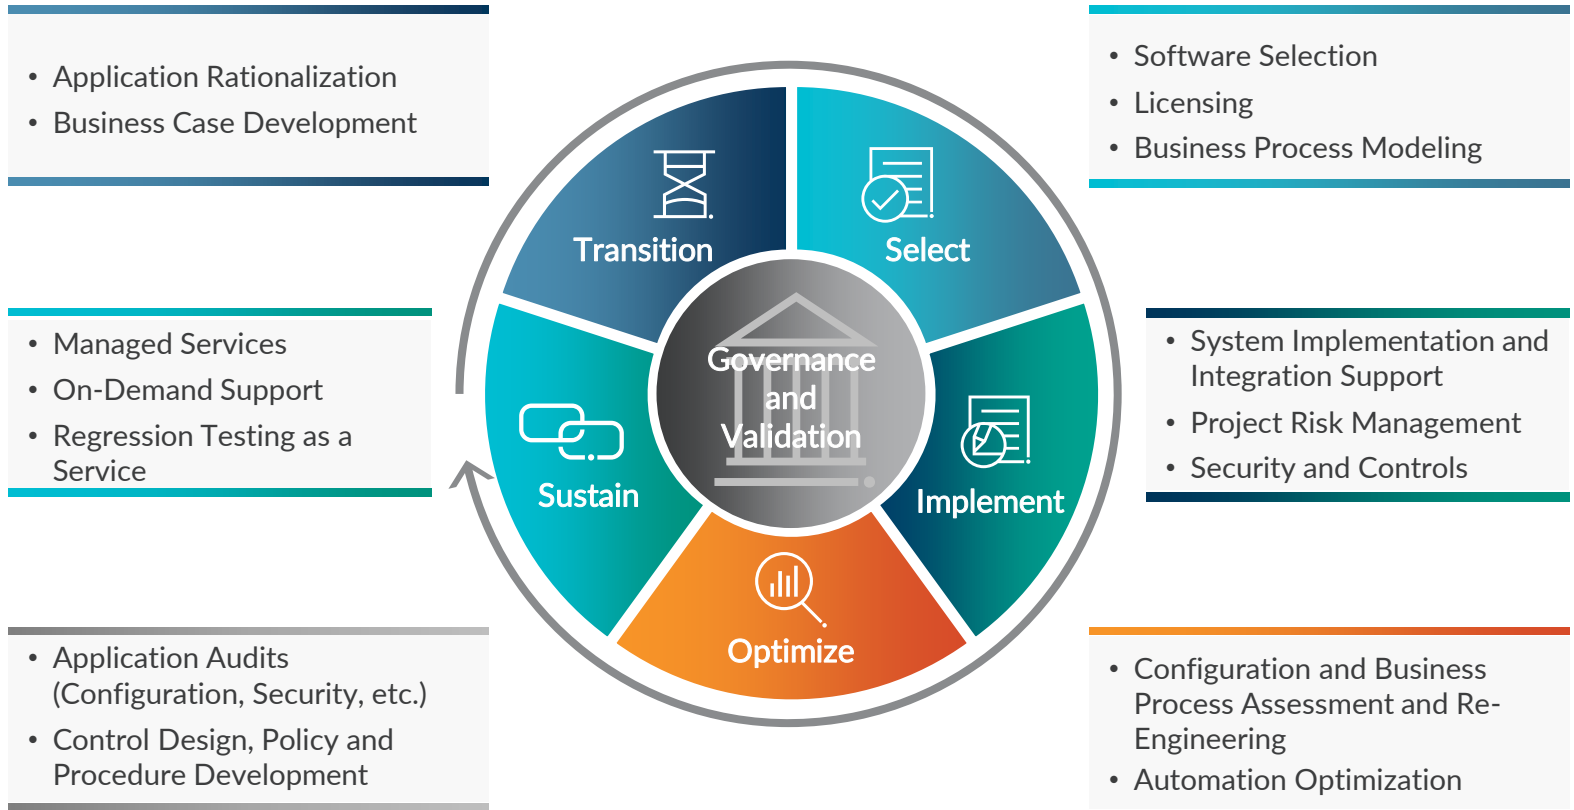

### Decrease global financial complexity and risk

Quickly adapt to changing local and global financial requirements with a flexible, guided, rules-based chart of accounts and dimensions that enable you to easily and accurately manage your financial operations.
