

Business Process Automation

In today's competitive environment, businesses must strive to streamline processes and leverage technology to achieve effective change management. Business Process Automation increases productivity, saves valuable time and helps your bottom line. Now, organizations can accelerate digital transformation with the powerful and easy-to-use Nintex Platform, the most complete platform for process management and automation. Nintex is equipped with a complete platform of tools for managing, automating, and optimizing business processes with power, ease of use and little code.

As a 6-time Nintex Partner of the Year and Certified Reseller, Protiviti is uniquely qualified to help your organization take full advantage of the entire Nintex platform to automate your processes and transform your business.

Our Nintex Services & Support

Protiviti can provide you with a dedicated expert that can assess your processes and guide you and your organization on the right path when choosing tools on the Nintex Platform. We have helped hundreds of organizations increase sustainability, simplify the workplace and maximize compliance efforts.

The Nintex Platform

The Nintex Platform makes it fast and easy to manage, automate, and optimize your business processes. Visually plan, map, and manage your business processes with tools process owners and participants love to use. Identify the processes best suited for or in need of automation and get started with clicks, not code. Optimize your business processes leveraging the data created through your automated processes.

Nintex Promapp® Process Mapping & Management

Establish total visibility and control over your enterprise processes. Use visual process mapping software to encourage company-wide collaboration, increase accountability, and improve your processes—all with one easy-to-use platform.

Mobile Apps & Forms

Users can receive notifications from their mobile app, fill out and submit forms, review and approve documents, and keep business processes running efficiently—from anywhere, on any device.

Advanced Workflow

Leverage powerful and easy-to-use workflow automation software to streamline the processes that make up the core of your business. Ensure every task advances to the next stage of the process to make sure your enterprise runs more efficiently.

Nintex Foxtrot® RPA

Leverage trained bots to quickly and cost-effectively automate routine tasks without the use of code. Users are now equipped with a comprehensive, enterprise-grade process management and automation solution that streamlines processes.

DocGen®

Generate precise and accurate documents for sophisticated business functions like sales proposals, contracts or work orders. Pull data from multiple sources. Output data to a variety of endpoints. And know, above all, your document data is secure and compliant throughout the process.

Nintex Sign™ powered by Adobe Sign

Completing approval processes with an electronic signature allows businesses to move faster. You can create e-signature tasks within your automated workflows with just a few clicks. Automate simple to sophisticated processes using a reliable, enterprise-grade solution.

Process Intelligence

Explore your data and find actionable insights. Monitor workflow performance, discover data-driven trends, and transform your business processes with our integrated analytics tools.

Xtensions™ Framework

Nintex Connectors integrate your business apps within your automated workflows. Nintex Connectors cover the popular apps you use every day, and our Xtensions™ framework lets you build and customize your own connector.

“Our organization needed to automate our Paid Time Off Process for our 3,000 domestic and international employees. Using the Nintex Platform, Protiviti was able to automate this extensive process that performs various administrative functions such as permissions on the PTO records, daily accrual of PTO, PTO balance modifications when a user is hired/terminated and yearly balance carryover calculations.” - Global Apparel Company
