

# Office 365 Feature Roadmap

## Office 365 has an App for That

Exchange, Skype SharePoint, Project Server...these are some of the standard applications that anchor the Microsoft stack. O365 keeps these features front and center and introduces a steady influx of newcomers such as Flow, Planner and Teams. With so many tools available, where do you begin, which is best for the job and how do you start planning to integrate these capabilities into your cloud?

## Identify, Prioritize and Plan Your O365 Roadmap

Our O365 Architects lead 1-2 day workshops to deliver an in-depth tour of relevant O365 features, review the current SharePoint use cases and discuss migration from legacy environments.

Our experts will provide a tailored O365 Roadmap, identifying the best O365 features for you, while also providing the steps needed to achieve success from your initial deployment into maturity.

### • • • Activities

Assessment of existing business objectives to identify key collaboration components for the Roadmap	On-site demonstration of O365 Features
Workshops with select stakeholders/ departments focused on collaboration challenges and opportunities	Review of existing customizations and 3rd party tools

## Audience

This service is designed for your organization's SharePoint administrators, current site owners and collaboration leads.

## Deliverables

The O365 Feature Roadmap creates an actionable Roadmap for your short- and long-term O365 vision, including, but not limited to:

- Mapping existing line-of-business capabilities to one or more O365 Features
- Developing a high level migration strategy
- Defining a process for evaluating and rolling out new O365 services
- Creating an O365 Roadmap for your organization including key findings and recommendations

## Duration

This offering is typically completed within a 3-4 week timeframe with a minimum of one on-site visit for the workshops.
