Office 365 Tenant Configuration

Office 365 tenant configuration involves a number of key technical decisions that will have a bearing on the scalability, performance, regulatory compliance and information security of your cloud environment. Organizations must carefully consider specific O365 settings (e.g. tenant name, region, etc.) which cannot be modified after a tenant has been initialized.

Setting up your O365 tenant without proper planning can result in chronic issues affecting productivity, brand recognition, increased maintenance costs and potentially hinder the adoption of the O365 platform within the organization.

Ensuring the Long Term Preparedness of Your Tenant

This offering enables your organization to realize the full potential of the O365 platform by ensuring your new Cloud environment is:

- Scalable
- Secure
- Promotes end user adoption of O365
- Provides best practice guidance and recommendations

- Optimizes cloud based resource usage to meet current business needs
- Recommends processes and policies to efficiently administer the tenant

• • • Activities

Protiviti understands that each organization may be at different stages and have varying needs. The following activities can quickly be tailored to your specific needs:

Identify & plan for O365 tenant configuration and deployment	Setup & configure O365 tenant
Plan & configure an Identity and Access Management strategy, including Azure AD Connect, Multi Factor Authentication, Modern Authentication, Mobile Device Management, etc.	Tenant Assessment: For organizations with an existing Office 365 tenant, Protiviti can perform an audit of the current configuration and security to validate and recommend changes.

Internal Audit, Risk, Business & Technology Consulting

Audience

This service is designed for your organization's IT staff who have direct involvement and understanding of the infrastructure, security and network requirements.
