

SAP® on Azure: Innovation in the Cloud

Protiviti's SAP on Azure Cloud Services provide:

A beginning-to-end, streamlined cloud plan. From latency considerations to optimization and security, Protiviti helps clients maneuver the road to successful cloud utilization when working with SAP on Azure. Let us handle the details, answer the pertinent questions and customize the architecture and strategy.

Determining the SAP on Azure Cloud strategy that's right for your organization begins by examining questions like:

- Which is best: public, private or hybrid cloud?
- How will I connect to my data in the cloud?
- Do I need managed services for my cloud environment?
- How secure will my information be in the cloud?
- Can my team support our cloud environment?
- Should I deploy a new BI environment in the cloud or migrate my existing BI environment?

Protiviti's cloud strategists excel in the following areas:

				
Architecture Strategy	Security Assessment	SAP Solutions	Custom Solutions	Managed Services
<p>Design a strategy to build reliable, scalable, and secure solutions on Azure including:</p> <ul style="list-style-type: none"> • Cloud assessment and road map • Data management plan • Connectivity considerations • Performance tuning • Security design 	<p>Develop and administer a comprehensive Azure security assessment, ensuring Azure environments and data are always protected</p> <ul style="list-style-type: none"> • Intrusion protection • Security administration • Compliance services 	<p>Design, build and deploy mission critical SAP and other workloads on the Azure cloud platform including:</p> <ul style="list-style-type: none"> • SAP BW/4HANA® and SAP BW on HANA • SAP HANA® Enterprise • SAP® BusinessObjects™ • SAP Enterprise Information Management solutions 	<p>Create a cloud environment built just for your unique needs, from multi-server VPCs (Virtual Private Cloud) to pre-configured SAP infrastructure components for rapid solution deployment</p> <ul style="list-style-type: none"> • Reliable hosting environment • Flexible scalability • On-demand infrastructure 	<p>Manage and monitor your cloud environment to provide higher business efficiency, reduced costs and agility through:</p> <ul style="list-style-type: none"> • Protection of mission critical operations • Highly-trained support staff • System and software readiness • Familiarity with client needs and deployment • Integrated with your support team

Why Partner with Protiviti?

Whether you are looking to move all or part of your Business Intelligence environment to the cloud, or build a cloud solution from the ground up, determining how to get started can be complicated. More and more clients are turning to the benefits of a cloud environment, eliminating capital costs and dramatically reducing operational costs.

Protiviti's cloud experts are prepared to offer a customized cloud strategy plan using SAP on Azure.

Our cloud strategists are some of the best in the industry, focused on architecting and implementing SAP BusinessObjects and SAP HANA environments in the Azure cloud. We have long-standing relationships with both Microsoft and SAP, ensuring your cloud strategy is equipped to meet critical business needs today, tomorrow and well into the future.
