

Cloud Cost Management

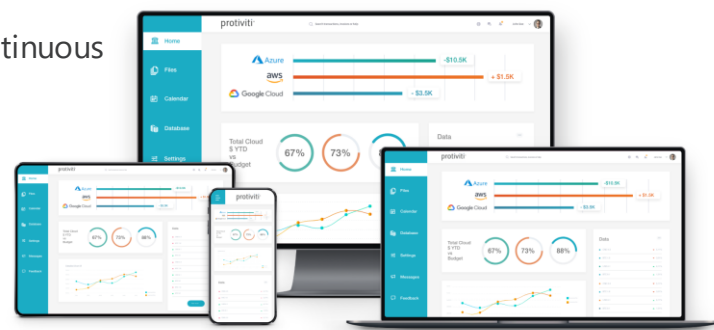

Expert Solutions for Controlling Spend in the Cloud

As organizations embrace the use of cloud infrastructure and technologies, traditional IT capital expenditure budget processes have been replaced with an increase in IT operational expenditures. This is due to the accessibility of on-demand cloud resources, decentralized use, reduced control on resource provisioning, and a change in methods or tools that allow for financial predictability. Protiviti's Cloud Financial Operations Solutions allow organizations to develop a predictable path for cloud expenditure.

Keeping Costs Within Budget

The successful shift from one-time annual budgeting to continuous expenditure monitoring is reliant on multiple factors:

- Collaboration between IT and financial teams
- Cloud-resource configuration governance
- Clarity on current and future state expenditure
- Real-time monitoring and alerting
- IT access control

Our Solutions for Cloud Cost Control

Expenditure Monitoring & Reporting Dashboard

Consolidating the resource provisioning, de-provisioning, and related expenditure data provides a single view of current and future state costs. Protiviti helps clients with the development and customization of visual dashboards that enable monitoring & reporting across teams.

Platform Tooling & Configuration

Each cloud platform provides unique tooling and configuration attributes that enable the collection of resource utilization. Protiviti supports clients with configuring, reviewing and remediating each element to ensure expenditure and inventory data collected and reported is accurate.

FinOps Governance Structure Development

Protiviti helps clients develop a governance structure that incorporates elements such as identity access management, resource configuration restrictions, and associated policies to manage cost.

FinOps Process Assessment

For organizations that are looking to be further informed on existing FinOps processes and maturity, Protiviti will review processes, document gaps or findings, and provide recommendations for improvement on resource utilization and overall maturity of existing financial operations processes.

Cost Savings Identification

Through obtaining an understanding of environment requirements, future plans, and existing resource utilization, Protiviti can utilize an organization's existing data and native tooling to identify opportunities within the cloud platform that will lead to immediate cost savings.

Cloud Cost Management

Our Cloud Solutions

We help clients maximize the value of the cloud. From envisioning and planning, through migration, implementations and managed services, we provide an end-to-end approach to support your cloud journey.

Strategy and Governance

- Strategy and Assessment
- Governance
- Center of Excellence
- Financial Governance

Transformation and Modernization

- Transformation Program
- Cloud Architecture
- Infrastructure Modernization
- Application Modernization
- Modern Workforce Implementation
- Dynamics 365 Implementation

Cloud Migration

- Full Data Center Migration
- Single Workload to Cloud
- SAP Migration to Cloud
- Microsoft 365 Migration

Cloud Security

- Advisory Services
- Secure Architecture
- DevSecOps
- Vulnerability Management as a Service
